

Value-based methodology for
integrated care supported by ICT

The Treviso Pilot design

AULSS2 Marca Trevigiana dr.ssa Elena Procaccini
ISRAA dr. Oscar Zanutto

Target: older people over 65 with MCI (Mild Cognitive Impairment)

The main challenges in VBHC implementation are:

- The integration between social and health domains
- The local stakeholder engagement
- Low digital literacy among older population
- Moving from volume based services and reimbursement approach towards a value based one
- Health record data interoperability
- ICT devices' interoperability

How to face them starting from what we have learned so far?

Low digital literacy among older population

SUPPORT

Give a prompt response to any doubt or technical problems will help them keep their motivation!

Integration between social and health domains & Local stakeholders engagement

SPREAD THE WORD

CONNECT

Moving from volume based services and reimbursement approach towards a value based one

- A real cultural change for both patients and professionals!

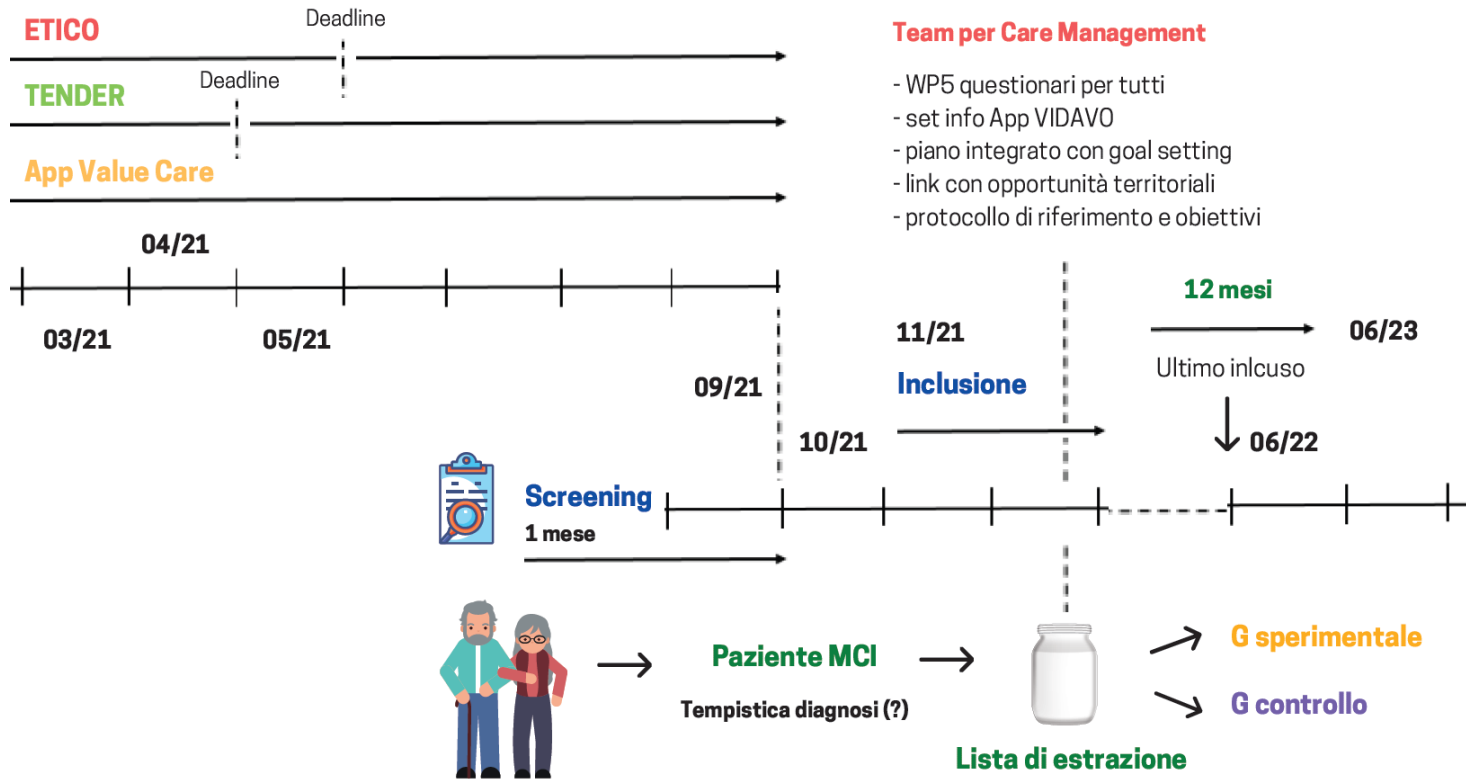

AWARENESS

MULTI DIMENSIONAL APPROACH

Put these words into practice....

Lesson learnt	VALUECARE implemented or planned activities
Support	<ul style="list-style-type: none"> • Keep the IT as intuitive as possible • Initial training on VALUECARE • Helpdesk service
Spread the word & Connect	<ul style="list-style-type: none"> • Strong local dissemination plan • Database of already existing initiatives
Awareness	<ul style="list-style-type: none"> • Training on VBHC • Co-design activities
Multidimensional approach	<ul style="list-style-type: none"> • Creation of the VALUECARE Care Team

Team per Care Management

- WP5 questionari per tutti
- set info App VIDAVO
- piano integrato con goal setting
- link con opportunità territoriali
- protocollo di riferimento e obiettivi

“Health is a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity.”

WHO, 1948
